PROFESSIONAL SUMMARY

Automation Designer/Architect with 8.5 years of experience delivering enterprise-scale **RPA and intelligent automation solutions** for global organizations. Proven expertise in **Power Automate, WorkFusion RPA, n8n and Boomi**. Owns the full automation lifecycle: discovery, feasibility/ROI, architecture/design, build, deployment and hypercare, supported by strong engineering fundamentals (**Java/Python**, API integration) and governance exposure (Architecture Review Board). Proven results include **~35 FTE savings** on a single automation and organization wide tooling adoption. Comfortable engaging **Director/VP stakeholders**, driving architecture decisions, and delivering production automations in **~2-month** release cycles using **Jenkins CI/CD** and metrics dashboards (Jira/Monday.com/Tableau).

SKILLS

- **Automation / RPA / IA:** Power Automate (cloud and desktop), WorkFusion (RPA & ML), n8n flow, Boomi workflow automation, AI Builder/OCR (information extraction), Intelligent Automation design flow, exception handling & resiliency.
- **Architecture & Governance:** Automation Feasibility & ROI Analysis, Solution Architecture, Reference Frameworks, Enterprise Automation Frameworks, TOGAF Foundation.
- **Integration & Engineering:** REST APIs, system integration, Java based automation frameworks (ODF), Python tooling
- **Delivery & Ops:** Jenkins CI/CD, Jira, Monday.com, Tableau reporting, stakeholder management, cross functional global delivery.
- **Cloud & AI:** AWS (Foundational), Agentic AI-driven automation (n8n/Boomi)

WORK EXPERIENCE

Software Designer III – Hewlett-Packard Enterprise / Bengaluru – Aug 2021 – Present

- Architect and deliver end-to-end automation solutions using Power Platform and WorkFusion based ODF framework.
- Lead feasibility studies, benefit estimates, defined solution options, architecture blueprints, and presents design to the enterprise architecture board.
- Played a key role in delivering solutions that generated significant operational cost savings and scalability improvements. And enhance code quality through reviews.
- Establish delivery practices for production deployment using Jenkins, business dashboard via Tableau & operation tracking at Jira/Monday.com.

Team Lead - Capgemini / Pune - Aug 2017 – Jul 2021

- Designed and led delivery of enterprise automation solutions for BFSI clients with high compliance requirements.
- Acted as technical owner for solution design, code quality, and architecture decisions.
- Supported pre-sales and requirement discussions with client stakeholders.

EDUCATION & CERTIFICATIONS

B. Tech, Indian Institute of Technology (IIT Kanpur) - Jun 2017

TOGAF Enterprise Architecture Foundation

Oracle Java Programmer

WorkFusion ML Engineer

WorkFusion RPA Developer
